Specify in what measurable ways the project will strengthen the capacity of the project partner(s) to contribute to the long-term results and project objective. \*

Max 175 words.

How will your project's results live on when SI funding has ended? Describe how the target groups and/or the project partner(s) will continue the work. \*

Max. 175 words.

## Risk analysis

**Risk factor:** Risk is the potential for a defined event to occur with negative consequences for the project; risk is about future uncertainty.

When identifying risks and risk mitigation measures it is essential to be as specific as possible and to have the local context in mind. A thorough risk analysis increases the chances of a project being successful.

Please identify risks that your project might run into, both internal and external ones.

**Internal risks:** Internal risks are risks that may occur within the project which could have a negative influence on achieving the estimated results. Internal risks could be conflicts within the project, illness or other absence of key personnel, failure to sustain results. The above-mentioned risks are only examples and are not in any way exhaustive.

**External risks:** External risks are risks outside the control of the project which could have a negative influence on achieving the estimated results. External risks could be related to political, institutional, economic, environmental, social or technological conditions as well as obstacles regarding the safety of participants. The above-mentioned risks are only examples and are not in any way exhaustive.

**Corruption:** Please note that risk of corruption, both internal and external, **MUST** be included in the risk analysis.

You add more risks by clicking "Insert new block here" below.

**Risk factor \***

Specify the risk you have identified.

Max 50 words.

**Risk valuation - Likelihood \***

- 1 = Unlikely (It is unlikely that the risk will occur)
- 2 = Possible (It is possible that the risk will occur)
- 3 = Likely (It is likely that the risk will occur)
- 4 = Certain (It is almost certain that the risk will occur)

Indicate the likelihood of the risk occurring.

**Risk valuation - Consequence \***

- 1 = Minor (Very limited influence on the ability to carry out activities and achieve results)
- 2 = Moderate (Limited influence on the ability to carry out activities and achieve results)
- 3 = Major (Major influence on the ability to carry out activities and achieve results)
- 4 = Severe (Very substantial influence on the ability to carry out activities and achieve results)

Indicate the consequences of the risk if it occurs.

**Risk valuation - Product. \*Multiply\* the likelihood and the consequence with each other and choose the number here. \***

- 1
- 2
- 3
- 4
- 6
- 8
- 9
- 12
- 16

The result of the likelihood **multiplied** by the consequence.

**Risk mitigation \***

What will be done to

- reduce the likelihood of the risk occurring
- limit the damage of the risk if it does occur

Max. 100 words
